Abstrak

Innovation design presents an approach to designing shared value for businesses, non-profit organizations, end-users and society. The societal and economic challenges we are currently facing, such as the aging population, energy scarcity and environmental issues, are not just threats but are also great opportunities for organizations. Innovation Design shows how organizations can contribute to the process of generating value for society by finding true solutions to these challenges. And at the same time it describes how they can capture value for themselves in business ecosystems that care for both people and planet.

This book covers, creating meaningful innovations that improve quality of life, engage users and provide value for organizations and other stakeholders, guiding the creation of shared value throughout the innovation process, with a practical and integrative approach towards value that connects ideas from economics, psychology, sociology and ecology, designing new business models and business ecosystems to deliver sustainable benefits for all the involved parties and stakeholders, addressing both tangible and intangible value.
