

Manual of spine surgery / Uwe Vieweg, Frank Grochulla, editors

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20426195&lokasi=lokal>

Abstrak

This manual of spine surgery has become necessary as a consequence of the rapid expansion of instrumented spine surgery using different minimally invasive and non-fusion techniques. To do justice to this development, the manual aims to present the different techniques to spinal surgeons (orthopaedic and neurosurgeons) in a clear and instructive way using detailed illustrations. The description of different open, less invasive or minimally invasive techniques will provide the spinal surgeon with useful guidelines for their use. The success of any spinal operation depends on good definition of the indications, consideration of the contraindications, technical and organisational factors, good operating technique and correct preoperative preparation and positioning of the patient.
