Abstrak

Radiation oncology : MCQs for exams' (ROME) will cover the essential aspects of radiation physics, radiobiology, and clinical radiation oncology designed to meet the needs of a large scale of examinees. Topics of this new book will be in the order of our previous "Basic radiation oncology" (Springer, 2010) with additional two new chapters (Pediatric tumors and rare tumors-benign diseases) making a total of 15 chapters and instead of old style question and answer format, current MCQ examination pattern helpful for both oral exams and written exams is used in this comprehensive bedside recall book complementing the "Basic radiation oncology"1st edition.
