

Augmented reality law, privacy, and ethics : law, society, and emerging AR technologies / Brian D. Wassom

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20426800&lokasi=lokal>

Abstrak

Augmented reality law, privacy, and ethics is the first book to examine the social, legal, and ethical issues surrounding AR technology. Digital eyewear products have very recently thrust this rapidly-expanding field into the mainstream, but the technology is so much more than those devices. Industry analysts have dubbed AR the "eighth mass medium" of communications. Science fiction movies have shown us the promise of this technology for decades, and now our capabilities are finally catching up to that vision.

Augmented reality will influence society as fundamentally as the Internet itself has done, and such a powerful medium cannot help but radically affect the laws and norms that govern society. No author is as uniquely qualified to provide a big-picture forecast and guidebook for these developments as Brian Wassom. A practicing attorney, he has been writing on AR law since 2007 and has established himself as the world's foremost thought leader on the intersection of law, ethics, privacy, and AR. Augmented reality professionals around the world follow his Augmented Legality® blog. This book collects and expands upon the best ideas expressed in that blog, and sets them in the context of a big-picture forecast of how AR is shaping all aspects of society.
