

Conjugate heat and mass transfer in heat mass exchanger ducts

Li-Zhi, Zhang, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20426957&lokasi=lokal>

Abstrak

Conjugate heat and mass transfer in heat mass exchanger ducts bridges the gap between fundamentals and recent discoveries, making it a valuable tool for anyone looking to expand their knowledge of heat exchangers. The first book on the market to cover conjugate heat and mass transfer in heat exchangers, author Li-Zhi Zhang goes beyond the basics to cover recent advancements in equipment for energy use and environmental control (such as heat and moisture recovery ventilators, hollow fiber membrane modules for humidification/dehumidification, membrane modules for air purification, desiccant wheels for air dehumidification and energy recovery, and honeycomb desiccant beds for heat and moisture control). Explaining the data behind and the applications of conjugated heat and mass transfer allows for the design, analysis, and optimization of heat and mass exchangers.
