

Lees' process safety essentials : hazard Identification, assessment and control

Mannan, Sam, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20427162&lokasi=lokal>

Abstrak

Lees' process safety essentials is a single-volume digest presenting the critical, practical content from Lees' loss prevention for day-to-day use and reference. It is portable, authoritative, affordable, and accessible, ideal for those on the move, students, and individuals without access to the full three volumes of Lees'. This book provides a convenient summary of the main content of Lees', primarily drawn from the hazard identification, assessment, and control content of volumes one and two. Users can access essentials for day-to-day reference on topics including plant location and layout; human factors and human error, fire, explosion and toxic release, engineering for sustainable development, and much more.
