Abstrak

An integrative introduction to the theories and themes in research on creativity, the second edition of creativity is both a reference work and text for courses in this burgeoning area of research. The book begins with a discussion of the theories of creativity (Person, Product, Process, Place), the general question of whether creativity is influenced by nature or nurture, what research has indicated of the personality and style of creative individuals from a personality analysis standpoint, and how social context affects creativity. This wide-ranging work then proceeds to coverage of issues such as gender differences, whether creativity can be enhanced, if creativity is related to poor mental or physical health, and much more.
