

Evaluating performance interventions: performance

Russell, Susan, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20429026&lokasi=lokal>

Abstrak

Various types of performance interventions exist, few organizations completely evaluate anything but basic training interventions. This issue discusses several evaluation models, methods, and tools used to evaluate different types of performance interventions including consultative, techno-structural, and process-system interventions. It compares evaluation models in the context of soft data, and discusses how performance interventions can be jeopardized.
