Abstrak

Ketersediaan sarana dan prasarana PHBS dapat mempengaruhi penerapan perilaku hidup bersih dan sehat pada seseorang. Penelitian ini dilakukan bertujuan untuk melihat apakah terdapat hubungan antara ketersediaan sarana dan prasarana perilaku hidup bersih dan sehat (PHBS) di rumah dan sekolah dengan perilaku hidup bersih dan sehat anak sekolah dasar. Desain penelitian adalah studi cross sectional yang dilakukan kepada 106 anak kelas 4 dan 5.

Hasil penelitian menunjukkan bahwa sebagian besar anak-anak memiliki ketersediaan sarana dan prasarana PHBS yang memadai serta perilaku hidup bersih dan sehat yang baik. Penelitian ini juga menyimpulkan bahwa tidak terdapat hubungan antara ketersediaan sarana dan prasarana PHBS di rumah dan sekolah dengan perilaku hidup bersih dan sehat pada anak sekolah dasar kelas 4 dan 5. Implikasi penelitian ini agar semakin diperhatikan ketersediaan sarana dan prasarana yang menunjang pelaksanaan PHBS supaya dapat berjalan dengan baik.

.....The availability facilities and infrastructure of clean and healthy living behavior can affect people to apply the clean and healthy living behavior. This research aimed to see whether there is a relationship between the availability of facilities and infrastructure for clean and healthy living behavior in home and school with the adaption of clean and healthy living behavior in elementary school childrens. The study design was cross sectional conducted at 106 respondents.

The results showed that most of the children have the availability of facilities and infrastructure of clean and healthy living behavior sufficient and the adaption of clean and healthy living behavior was good. The study also concluded that there was no correlation between the availability of facilities and infrastructure of clean and healthy living behavior in home and school with the adaption of clean and healthy living behavior in elementary school children grades 4 and 5. The implication of this research that the more attention to the availability of facilities and infrastructure that support the implementation of clean and healthy living behavior in order to run properly.
