ABSTRAK

The significance of of photography is undeniable as it has integrated deeply in the modern society. It becomes important to investigate the complex process of photography in regard to its spatial context. To investigate the studio place of photographers is to study the configuration of its space and all its spatial components.

Space configuration in photography studio space is meant as an investigation of the space. the objective of configuration in this context is to understand the way its space affect the photography process and vice versa. Moreover, it is essential firstly to understand the experiential perspective in photography activity in order to learn the configuration of its spac
