Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20430576&lokasi=lokal>

Abstrak

Penelitian ini membahas tentang gambaran pemenuhan dari pelaksanaan sistem tanggap darurat di Fakultas Teknik Universitas Indonesia tahun 2016 berdasarkan Pedoman Kesiapsiagaan dan Tanggap Darurat Universitas Indonesia yang mengacu pada NFPA 1600 edisi 2016. Penelitian merupakan penelitian kualitatif dengan desain penelitian deskriptif analitik.

Metode yang digunakan berupa wawancara, observasi langsung, dan telaah dokumen menggunakan instrumen checklist self-assessment for conformity NFPA 1600 edisi 2016. Penelitian dilakukan terhadap enam elemen di dalam NFPA 1600 edisi 2016 dan diperoleh hasil dengan total rata-rata terpenuhi sebesar 58,20%, tidak terpenuhi sebesar 29,40% dan tidak dapat teraplikasikan (not applicable) sebesar 12,40%.

.....This Research discusses about the compliance of emergency response system implementation at Faculty of Engineering Universitas Indonesia in 2016, based on the University's Guidelines for Emergency Preparedness and Response which refer to 2016 edition of NFPA 1600. It is a qualitative research with descriptive analytic design.

The method being used in this research are interview, observation, and document study using self-assessment for conformity checklist of NFPA 1600, 2016 edition. This research assess six elements of 2016 edition of NFPA 1600. The result of this study shows 58,20%% points are conforming, 29,40% are nonconforming, and 12,40% are not applicable.
