Abstrak

ABSTRAK

Skripsi ini membahas tingkat pengetahuan mengenai mengemudi yang aman pada pengemudi bis kuning kampus UI tahun 2016. Tingkat pengetahuan diukur berdasarkan tolak ukur Peraturan Menteri Perhubungan dan Undang-Undang Lalu Lintas serta wawasan mengenai safety driving. Penelitian ini merupakan penelitian kualitatif dengan analisis univariat. Hasil penelitian menyatakan bahwa pengemudi bis kuning perlu menerima sosialisasi mengenai aturan berkendara yang aman; pihak pengawas perlu melakukan edukasi mengenai safety driving melalui pelatihan khusus; serta melalui apel rutin senantiasa diingatkan tentang nilai-nilai keselamatan dalam mengemudi.

ABSTRACT

This research discusses the level of knowledge about safe driving of the UI's public transportation driver in 2016. The level of knowledge is measured by Regulation of the Minister Transportation, Trafic Legislation of Republic Indonesia, and insight about safety driving. This is qualitative research by univariate analysis. The result of research stated that driver should receive the socialization of the safety driving rules; the supervisors need to do education about safety driving through specialized training; as well as through regular meetings are reminded about the values in safety driving.
