Abstrak

Tesis ini membahas mengenai analisa ketentuan Tingkat Komponen Dalam Negeri (TKDN) yang dipersyaratkan atas alat dan/atau perangkat telekomunikasi berbasis standar teknologi Long Term Evolution (LTE) ditinjau dari ketentuanketentuan yang diatur dalam Agreement On Trade-Related Investment Measures (Perjanjian TRIMs). Penelitian ini bersifat yuridis normatif dan preskriptif.

Hasil penelitian menyimpulkan bahwa ketentuan Tingkat Komponen Dalam Negeri (TKDN) yang dipersyaratkan atas alat dan/atau perangkat telekomunikasi berbasis standar teknologi Long Term Evolution (LTE) tidak sesuai dengan ketentuan Agreement On Trade-Related Investment Measures (Perjanjian TRIMs) dan karenanya harus dilakukan langkah-langkah penyesuaian oleh pemerintah Indonesia agar Indonesia tidak melanggar kewajibannya sebagai negara anggota World Trade Organization.

.....This thesis discusses the analysis of Local Content Requirements (LCR) which is required for any telecommunication devices and/or equipments with standardsbased technology Long Term Evolution (LTE) and its relation with the provisions stipulated in the Agreement on Trade-Related Investment Measures (TRIMs Agreement). Research conducted in this thesis is a normative and prescriptive study.

The research concluded that Local Content Requirements (LCR) which is required for any telecommunication devices and/or equipments with standardsbased technology Long Term Evolution (LTE) is inconsistent with the provisions of TRIMs Agreement and therefore there should be steps taken by the government of Indonesia to bring these measures into conformity with TRIMs Agreement which will eliminate the inconsistency with Indonesia?s obligations under the TRIMs Agreement as a member state of World Trade Organization.
