ABSTRACT

Pharmacy is a place of execution of the pharmaceutical practice by a pharmacist. In carrying out the pharmaceutical practice, pharmacists are expected to manage pharmaceutical preparations and provide clinical pharmacy services, in accordance with the standards of pharmaceutical practice at a pharmacy. Seeing the importance of the role of pharmacists in the pharmacy, pharmacists candidates are expected to have the knowledge and skill in carrying out the pharmaceutical practice in pharmacy. Apotek Kimia Farma No. 5 provides the opportunity for prospective pharmacists to practice the profession work to provide practical experience in carrying out the pharmaceutical practice to the public
