**ABSTRAK
**

Praktek Kerja Profesi (PKP) di Industri PT. Medifarma Laboratories bertujuan agar calon apoteker memiliki wawasan, pengetahuan, keterampilan, dan pengalaman dalam melakukan pekerjaan kefarmasian, kemudian agar dapat memahami penerapan Cara Pembuatan Obat yang Baik (CPOB) di industri dan gambaran nyata permasalahan yang dapat terjadi. PKP dilakukan selama 2 bulan dengan mempelajari sebagian departemen industri dan secara khusus di departemen Quality Control untuk melakukan tugas khusus. Tujuan dari pelaksanaan tugas khusus yaitu meningkatkan efisiensi membran filter pada penyaringan fase gerak untuk analisa di Kromatografi Cair Kinerja Tinggi (KCKT) dan menilai parameter yang berkaitan dengan penggunaan membran filter berulang. Peran apoteker dalam industri farmasi yaitu berada di posisi kunci meliputi produksi, Quality Control dan Quality Assurance. Penerapan CPOB diperoleh mahasiswa dengan mengikuti training basic GMP dan penjelasan setiap departemen.

**ABSTRACT
**

Profession internship at PT. Medifarma Laboratories company aims pharmacist candidate has knowledge, skill, and experience for doing pharmacist jobs, then to know the implementation Good Manufacturing Product (GMP) in pharmaceuticals industry and to face the real working world the problem that could be held. Profession internship was held during two months which studied a lot of section on the company and Quality Control specifically. Given special assignment in QC department which is about membrane filter. The aims to increase the efficiency membrane filter on the mobile phase filtration for analyzing in High Performance Liquid Chromatography (HPLC) and to give a value on the parameter which is related with the usage membrane filter usage. The role of pharmacist in pharmaceutical industry is key position on production, Quality Control and Quality Assurance department. The implementation of GMP which is get with joining GMP training basic and the explanation every department.
