

Knowledge sharing in knowledge-growing-based systems: A case in military operation

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20435978&lokasi=lokal>

Abstrak

Knowledge-Growing system (KSG) is a system that is capable of growing its knowledge along with the accretion in information as the time passes and uses it as the basis of making a decision. the knowledge growing mechanism in the system is performed by using observation multi-time A3s (OMA3S) information-inferencing fusion method. the smallest structure of KGS is an intelligent agent.
