

Paradigma giant seawall

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20436516&lokasi=lokal>

Abstrak

Flooding or inundation is frequently happened in Jakarta on the rainy season and during the high tides. This event has lead to the idea of constructing a Giant Seawall (GSW). The pros and cons of this emerging discourse are discussed in this article from the perspective of interests and also based on scientific reasons.
