

Miocene palynology of the Barito Basin, South Kalimantan

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20437730&lokasi=lokal>

Abstrak

This study has successfully disclosed the rich assemblage of palynomorph within the Miocene sediment of the Barito Basin , South Kalimantan. It is characterised by the last occurrence of *floschuetzia trilobata* (middle/late miocene boundary) and the first occurrence of *F. meridionalis* (early/middle miocene boundary).
