Microalgae biomass productivity by co2 injection in correlation with pH variation in photobioreactor

Deskripsi Lengkap: https://lib.ui.ac.id/detail?id=20437731&lokasi=lokal

\_\_\_\_\_

## Abstrak

Microalgae can bring solution for reducing CO2 and as alternative sustainable energy source. CO2 reduction by microalgae was done by fixation of CO2 during photosynthesis while they grow. The objective of the study is to get pH condition from CO2 injection into cultivated microalga that gives better productivity of biomass
