

Using community outreach to promote integrated health care: A pilot project

Foley, Jessica M, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20437769&lokasi=lokal>

Abstrak

Although research has demonstrated the efficacy of psychological services for ameliorating physical conditions, consumers are often uninformed of the advantages of integrated health care. To begin to address this knowledge gap, the authors developed, offered, and assessed a 2-hr community outreach program.
