

Ulserasi rongga mulut yang sering dijumpai: dengan latar belakang kelainan imunologis (studi pustaka)

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20437943&lokasi=lokal>

Abstrak

An ulcer is an area of discontinuity of an epithelial surface. Ulceration is the commonest oral soft tissue disorders and vary greatly in term of etiology signs and symptoms, prognosis and treatment. Abnormalities of immune system can cause oral mucosal ulceration. The purpose of this paper is to discuss the management of some of the more common oral ulcer associated with immunologic disorders. Because the natural history and treatment varies with the diagnosis, the practitioner should became familiar with the clinical aspects of the various type of ulcerations so that appropriate treatment can be instituted.
