

Konsep layering (berlapis) pada restorasi komposit anterior (laporan kasus)

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20438234&lokasi=lokal>

Abstrak

In some cases, either dentist or patient complains about the appearance of anterior composite restoration. This problem caused by the wrong shading concept in handling variety of available composite systems. layering concept performs to overcome this problem by helping the clinician to understand the correct shading concept. This paper reports some cases in which need anterior composite restoration and restored according to layering concept. The conclusion of these three cases are that understanding the optical characteristic of dental composite and using the same composite system is important to achieve the esthetic goal.
