

Basic statistics for trainers

Shore, Jean Houston, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20441096&lokasi=lokal>

Abstrak

A basic knowledge of statistics allows trainers to make better decisions and understand data more fully. Presenting statistical data to stakeholders also helps you build a stronger business case for training. This Infoline will show you how to perform some basic statistical calculations and understand how to use statistics on the job.
