

ISTFA '97: proceedings of the 23rd International Symposium for Testing and Failure Analysis, 27-31 October 1997, Santa Clara Convention Center, Santa Clara, California

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20442506&lokasi=lokal>

Abstrak

Contents :

- Testing-Based Failure Analysis: A Critical Component of the SIA Roadmap Vision
- Experimental Figures for the Defect Coverage of IDDQ Vectors
- A CAD-Based Approach to Failure Diagnosis of CMOSLSI with Single Fault Using Abnormal IDDQ
- Test and Failure Analysis Implications of a Novel Inter-Bit Dependency in a Non-Volatile Memory
- Analysis of a Latent Deep Submicron CMOS Device Isolation Leakage Mechanism
- Scanning Fluorescent Microthermal Imaging
- Temperature Profiling with Highest Spatial and Temperature Resolution by Means of Scanning Thermal Microscopy (SThM)
- Thermal and Optical Enhancements to Liquid Crystal Hot Spot Detection Methods
- Application of Backside Photo and Thermal Emission Microscopy Techniques to Advanced Memory Devices
- A New Chemical Method of Wright Etch in the Delineation of Stacking Faults and Crystalline Defects in Fabrication Silicon Wafer Substrate
- Cross Sectioning with a Pivoting Sample Block
- Gain Reduction in Silicon Phototransistors Induced by Metallization Mask Misalignment
- The Identification of Thermal Fatigue Testing Method of Soldered Joints for Space Use
- Comparison Precision XTEM Specimen Preparation Techniques for Semiconductor Failure Analysis
- Temperature-Dependent Electronic Circuit Analogy for Predicting Wire Temperature as a Function of Current
- The Application of FIB Voltage-Contrast Technique Combining with TEM on Subtle Defect Analysis: Via Delamination After TC
- The Usage of Focused Ion Beam Induced Deposition of Gold Film in IC Device Modification and Repair
- Failure Analysis Challenges of Surface Micromachined Accelerometers
- Failure Analysis for Micro-Electrical-Mechanical Systems (MEMS)
- Investigation of Multi-Level Metallization ULSIs by Light Emission from the Back-Side and Front-Side of the Chip

- A Simple, Cost Effective, and Very Sensitive Alternative for Photon Emission Spectroscopy
- Novel Failure Analysis Technique
- An Application of Breakthrough Failure Analysis Techniques in Eliminating Silicon Dislocation Problem in Sub-Micron CMOS Devices
- Characterization of Californium-252 (252 Cf) as a Laboratory Source of Radiation for Testing and Analysis of Semiconductor Devices
- Dendritic Growth Failure of a Mesa Diode
- Application of Laser Scanning Microscope to Analyze Forward Voltage Snapback of Compound Semiconductors
- Interpretation of Sudden Failures in Pump Laser Diodes
- Through-Transmission Acoustic Inspection of Ball Grid Array (BGA) Packages
- Moisture Detection Method in Ceramic Package by Slight Current Measurement
- Laser Microchemical Technology: New Tools for Flip-Chip Debug and Failure Analysis
- Single Contact Electron Beam Induced Current Microscopy for Failure Analysis of Integrated Circuits
- Electrical and Chemical Characterization of FIB-Deposited Insulators
- IC Design Modification Using Laser Assisted Organometal Deposition
- Transmission Electron Microscopy (TEM) Specimen Preparation Technique Using Focused Ion Beam (FIB): Application to Material Characterization of Chemical Vapor Deposition of Tungsten (W) and Tungsten Silicides (Wsix)
- Automatic Fault Tracing Using an E-Beam Tester With Reference to a Good Sample
- The Business Aspects of Failure Analysis
- A Process Induced Failure Mechanism in the EEPROM Cell Its Identification and Solution
- Failure Isolation of Mobile Ions Using Secondary Ion Mass Spectroscopy
- Detection of Gate Oxide Defects Using Electrochemical Wet Etching in KOH: H₂O Solution
- Spin-On-Glass (SOG) Contamination Causing Single Via Failure
- Use of Failure Analysis Techniques to Optimize the Passivation Process for a TLM 0.35 um Process
- Effectiveness of Emission Microscopy in the Failure Analysis of CMOS ASIC Devices
- Elimination of Whisker Growth on Tin Plated Electrodes
- Characterization of CMOS Structures (0.6 um process) Submitted to HBM and COM ESO Stress Tests
- BiCMOS Die Sort Yield Improvement from Isolation of a Localized Defect Mechanism and Precision TEM Cross Section
- SEM Equipment Capabilities Evaluated for Sub-Half Micron Semiconductor Applications

- Voltage Contrast Application on 1M SRAM Single Bit Failure Analysis
- Index
