

## Surface engineering: proceedings of the 3rd International Surface Engineering Congress, august 2–4, 2004 Orlando Airport Marriott, Orlando, Florida, USA

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20442577&lokasi=lokal>

---

### Abstrak

#### Contents :

- Preface
- The Use of Ion Exchange Compounds as Corrosion Inhibiting and Sensing Pigments in Organic Coatings
- A Novel Self-Priming Coating for Corrosion Protection
- SVET Investigations of Protection Mechanism of Mg-rich Primer on Al 2024
- Development of Ni-Si-Nb APS Coatings for Sulfuric Acid Resistance
- Salt Fog Corrosion Testing of Al-Y-Co based Nanocrystalline and Amorphous Coatings Produced by Atmospheric Plasma Spray
- Advancements In Artificial Heart Valve Disks Using Nanoscale Thin Films Deposited By CVD and Sol-gel Techniques
- Nucleation Studies of Pulsed Bias Enhanced CVD on Biomaterials
- Machining Cancellous Bone Using Coated Cutting Tools
- Novel Diamond Coated Burs for Dental Drilling Applications
- Immobilization of Doxorubicin on Surfaces of Plasma Synthesized C/Fe and C/Fe/N Magnetic Nanoparticles for Targeted Drug Delivery
- Developments in CVD of Dental Tools - Aspects of Deposition and Characterization
- Experimental and Gas-Phase Modeling of Nanocrystalline Diamond Films Grown by Hot Filament Chemical Vapor Deposition
- Deposition of Polycrystalline Diamond Films on High Speed Steel Using TiN Interlayers
- Micro/Nanotribological Behavior of Interfaces in Total Replacement Joints
- Effect of Gas Composition on Sputtered TiCN Coatings
- MAX, an Innovative Solution for Measuring Stresses in Hard-to-Access Locations
- Surface Engineering for Improved Tribological Properties of Forming Tools
- Influence of High Pressure Water-Jet Assisted Turning on Surface Residual Stresses on Ti-6AL-4V Alloy by Measurement and Finite Element Simulation
- Optimization of Thermally Sprayed Metallic Nanocomposite Coatings
- Self-Protective Boronizing Paste for Surface Treatment of Steel and Cast Iron
- Tribological Behaviour of Diamond/HSS Couple : An Experimental and Numerical Study
- Creation of Various Diffusion Protective Coatings on Steel Parts by New Scanning Liquid Induction Carburizing (LINCARBTM) Technology

- Effect of Nickel Nano-Interlayers on the Property of CrN Coated Steels
- Pulsed Electrodeposition of Organofunctional Silanes for Improved Corrosion Protection of Aluminum Alloys
- Microstructure and Process Induced Residual Stresses of Laser Clad CPM-9V and CPM-10V Tool Steels
- Plasma Modification of Rutile TiO<sub>2</sub> for Improved Photoreactivity
- New Effective and Inexpensive Patented Method for Rapid Creation of Corrosion Resistant Surface Layer on Inexpensive Iron-Based Alloys
- A quest for a Protective Liner Against Steam Oxidation at High Temperature.
- Development of a Novel DC Plasma Source for Coating and Surface Modification Under Atmospheric Pressure.
- A Comparison of EBPVD and Thermal Spray Thermal Barrier Coating Systems
- New & Affordable Technical Solutions for Turbine Component Coatings
- Investigation of Micro/Nanoscale Friction Behavior of Grafted Poly-(Nisopropylacrylamide) on Silicon
- Nanotribological Properties of Nanocomposite CrBN and TiBN Thin Films
- P.R.I.M.E. Surface Coating - A Novel Technique of Applying Thick Ceramic Coatings
- Development and Characterization of Near Friction Less Carbon Coatings using a Large Area Filtered Arc Deposition System
- Friction and Wear Characteristics of a Modified Composite Solid Lubricant Plasma Spray Coating
- Hybrid Deposition Methods for Nanocomposite Coating Growth
- Deposition of Nanocrystalline Diamond Using A New Film Growth Regime
- Nano-engineered, Nanocomposite PVD Coatings for Superior Tribological Properties
- Magnetron Sputtered Nc-TiC/a-C Nanocomposite Coatings: Processing, Characterization and Properties
- Effect of Substrate Bias on Sputtered TiN Coatings
- Greening of Cleaning: Renewable Feed-Stock Alternatives in Surface Cleaning
- Bio-Based Alternative Solvents: How Well Do They Work
- Review of Thermally Sprayed Thermal Barrier Coatings
- Initiation and Growth of Delamination Cracks in Vacuum Plasma Sprayed Thermal Barrier Coatings
- Thermal Conductivity of Plasma and EBPVD Thermal Barrier Coatings
- Laser-based Inspection of Thermal Barrier Coatings
- Study of the Relationships Between Processing Parameters, Microstructure and Properties of Ni-Based Plasma Sprayed Thermal Coatings
- Sinter-Brazing of Carbides to P/M Steel
- The Surface Morphology of Rubber Compounds Studied by AFM
- Side Laser Cladding Deposition and Residual Stress in a Co-based Layer on Steel

- Characterization of (111) and (100) Textured CVD Diamond Sheets Using FTIR spectroscopy
- Growth and Characterization of N-doped Polycrystalline Diamond Films
- Author Index
- Keyword Index
