

Surface modification technologies XV: proceedings of the fifteenth International Conference on Surface Modification Technologies Held in Indianapolis, Indiana November 5-8, 2001

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20442581&lokasi=lokal>

Abstrak

Contents :

- Fifteenth International Conference on Surface Modification Technologies
Indianapolis, Indiana November 5-8, 2001
- Foreword
- Technical Sessions
- The PROTAL Process: An Economical Alternative for Producing a Clean Interface
in a Thermal Spraying Application
- Application of In-Process Reaction to the Fabrication of MgAl₂O₄/Al-Si
Composite Coating by HVOF Spraying
- Finite Element Modeling of Coating Architectures for Aluminum Die Casting
- Synthesis of Superlow Friction Carbon Films from Hydrogen Rich Acetylene
Plasmas
- Use of Advanced Soft-Metal Engineered Surfaces to Control Galling of Carbon
Steel Bolts in Gasketed Joints at Elevated Temperatures
- Fabrication and Characterization of TiB₂/TiC and Tungsten Co-Sputtered Wear
Resistant Coatings
- Structure and Mechanical Properties of Magnetron Sputtered Coatings in the Ni-
Al-N Ternary System
- Correlation of Nitrogen Gas Processing Level to Structural and Tribological
Properties of MoS₂/Ti/N Solid Lubricated Coatings
- Analysis of Composite Surfaces with the Atomic Force Microscope: A Problem
Solving Approach
- Characterization of Industrial Coatings with Atomic Force Microscopy
- Study by Atomic Force Microscopy: Effect of the Doping Anion on the Surface
Morphology of Polypyrrole Films
- Scanning Electron Microscopy (SEM) and Atomic Force Microscopy (AFM):
Complementary Techniques for High Resolution Surface Investigations
- Electrodeposition of Polypyrrole on Aluminum Alloy
- New Technology in Atomic Force Microscopy (AFM) for Faster Scanning Speeds
and Shorter Time-to-Result
- Formation of Bilayer Polypyrrole-Polyaniline Composite Coating for Corrosion
Protection of Steel
- Corrosion Protection of Al 2024-T3 by Particulate Filled Conducting Polymer
Coatings

- Experimental Determination of Interactions Between Molten Aluminum and Selected Die Coatings for Aluminum Pressure Die Casting
- Laser Peening: Current Status and Future Outlook
- Iron Aluminide Based Coating Deposited by High Energy Density Processes
- Interfacial Adhesion of Laser Clad Functionally Graded Materials
- Stability and Oxidation Resistance of Novel Metallic Fibers
- Controlled Superficial Cracking of the Substrate to Enhance Adhesion of Plasma Sprayed Coatings
- Residual Stresses in MoN and Mo₂N Coatings Deposited by Arc PVD on High Speed Steel Substrate
- A Study of Grain Boundary Precipitation During Plasma Nitriding of Steel
- Overview of Alternative Technologies for Chromium and Cadmium
- Role of Electroplated Chromium on the Corrosion Resistance of Decorative Thin Film Coatings
- Eco-Friendly Chromium and Cadmium Dry Plating
- Evaluation of Aluminum-Manganese as a Cadmium Replacement
- Zinc-Tin: A Versatile Alternative to Cadmium for Brush Plating Applications
- Hardening of Metallic Surfaces by Diffusion Processes (with and without Reaction)
- Vitroceramic Oxidic Systems as Coatings on Pure Titanium (Biomedical Substrates)
- Modification of Oxide Thermal Barrier Coatings Deposited on a Superalloy by Laser-Beam Radiation
- Subject Index
- Author Index
