

Mathematical laboratories for mathematical statistics: emphasizing simulation and computer intensive methods

Baglivo, Jenny A., author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20443127&lokasi=lokal>

Abstrak

Integrating computers into mathematical statistics courses allows students to simulate experiments and visualize their results, handle larger data sets, analyze data more quickly, and compare the results of classical methods of data analysis with those using alternative techniques. This text presents a concise introduction to the concepts of probability theory and mathematical statistics. The accompanying in-class and take-home computer laboratory activities reinforce the techniques introduced in the text and are accessible to students with little or no experience with Mathematica. These laboratory materials present applications in a variety of real-world settings, with data from epidemiology, environmental sciences, medicine, social sciences, physical sciences, manufacturing, engineering, marketing, and sports.

Mathematica Laboratories for Mathematical
