Abstrak

Penelitian ini bertujuan untuk mengetahui pengaruh person-job fit dan person-organization fit terhadap employee-customer identification yang dimediasi oleh organizational identification pada perawat di Sukabumi, Jawa Barat dengan jumlah sampel 157 orang. Penelitian ini merupakan penelitian metode kuantitatif dengan desain deskriptif serta menggunakan teknik structural equation modeling SEM yang diolah menggunakan Lisrel 8.51.

Hasil penelitian ini menunjukkan bahwa person-job fit pada perawat di Sukabumi tidak terbukti mempengaruhi employee-customer identification secara langsung tetapi dimediasi terlebih dahulu oleh organizational identification. Sedangkan person-organization terbukti memiliki hubungan dengan employee-customer identification baik secara langsung maupun ketika dimediasi oleh organizational identification.

.....

This research aims to identify the effect of person job fit and person organization fit to employee customer identification, through organizational identification as a mediator, to nurses in Sukabumi, West Java with 157 participants as the research sample. The present research used quantitative method with descriptive design, and employed a structural equation modelling SEM technique using Lisrel 8.51 program.

The results showed that the employee customer identification of nurses in Sukabumi is not affected by person job fit directly, but mediated first by the organizational identification. Meanwhile, the person organization fit give a positive impact to employee customer identification both directly and indirectly through organizational identification as a mediator.
