Abstrak

Penelitian ini bertujuan untuk menganalisis pengaruh penerapan e-government dan akuntabilitas terhadap persepsi korupsi pada Kementerian/Lembaga. Penelitian ini menggunakan metode kuantitatif dengan regresi linear berganda multiple linear regression dengan sampel Kementerian/Lembaga di Indonesia tahun 2011 sampai 2014. Variabel persepsi korupsi diukur menggunakan Indeks Integritas hasil Survei Integritas KPK, sedangkan variabel penerapan e-government diukur menggunakan Indeks Pemeringkatan e-Government Indonesia Indeks PeGi.

Hasil penelitian menunjukkan bahwa penerapan e-government berpengaruh negatif terhadap persepsi korupsi. Akuntabilitas kinerja dan akuntabilitas keuangan juga berpengaruh negatif terhadap persepsi korupsi. Oleh karena itu, Kementerian/Lembaga perlu meningkatkan proses administrasi melalui pemanfaatan e-government dan meningkatkan akuntabilitas kinerja serta akuntabilitas keuangan.

This objective aims to analyze the influence of e government implementation and accountability toward the corruption perception in the Ministry Institution. This research uses quantitative methods with multiple linear regression. The samples are Ministries Institution in Indonesia from 2011 until 2014. Corruption perception variable is measured using integrity index from integrity survey by KPK, while e government implementation variable is measured using Indonesian e government ranking index Index PeGi.

The results show that the e government implementation negatively influence the corruption perception. Performance accountability and financial accountability also negatively influence the perception of corruption. Therefore, the Ministry Institution needs to improve administrative processes through the use of e government and improve the performance accountability and financial accountability.
