Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20446638&lokasi=lokal>

Abstrak

ABSTRAK

Dalam peningkatan pelayanan pencatatan nikah atau rujuk, Pemerintah telah melakukan penetapan tarif nikah. Peningkatan tarif pencatatan nikah dapat berpengaruh pada jumlah pernikahan yang tercatat di KUA. Penelitian ini dilakukan untuk mengetahui pengaruh tarif nikah terhadap jumlah pernikahan di Indonesia. Penelitian ini menggunakan data panel metode Fixed Effect. Pengaruh kebijakan kenaikan tarif nikah akan menurunkan jumlah pernikahan di Indonesia. Sedangkan Produk Domestik Regional Bruto PDRB Perkapita setiap provinsi tidak mempengaruhi banyaknya jumlah pernikahan.

ABSTRACT

In the improvement of services or refer the marriage registration, the Government has set a marriage tariff. Improved recording rates of marriage can affect the number of marriages recorded at KUA. This study was conducted to determine the effect of marriage rates to the number of marriages in Indonesia. This study uses panel data methods Fixed Effect. The influence of policies on marriage rate increase will decrease the number of marriages in Indonesia. While the Gross Regional Domestic Product GDP per capita each province does not affect the number of marriages.
