

Annual review of broadband communications

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20447753&lokasi=lokal>

Abstrak

Contents :

- Contents by Author
- University Program Sponsors
- Academic Perspectives
- An Aspect-Oriented Approach for Dynamic Monitoring of a Service Logic Execution Environment
- Infrastructure as Platform: Services-Oriented Architecture, Virtualization, and 21 st-Century Communications
- Executive Perspectives
- Ubiquitous Broadband Access Networks with Peer-to-Peer Application Support
- High-Power Lithium Ion
- Profiting from Convergence
- Every Bit Better: Next-Generation Optical Transport Platforms
- The Necessity of MSANs in the Network Transformation Era
- Digital Rights Management
- Making Sense of Broadband Access
- Digital Convergence: Who Will Take the Cake?
- Physical-Layer Challenges in Gigabit Passive Optical Networks
- Ethernet
- An End-to-End Traffic and Hierarchical Traffic Management Architecture for Ethernet-Based Residential Triple-Play and Business Services
- Carrier-Class Ethernet Service Delivery for Business Access
- Cost-Effective and Practical Implementation of the Gigabit Ethernet for Home and Small-Business Applications
- GE ADM-Based Ethernet Service Transmission Solution
- Triple Play
- Transport Considerations for Triple-Play Deployments
- Successful Triple Play and Beyond
- Acronym Guide
