

Identification and bioactivity studies of flavonoid compounds from macaranga hispida (blume) mull.arg

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20447960&lokasi=lokal>

Abstrak

Two flavonoid compounds, 5,7,3',4'-tetrahydroxy-6-geranylflavonol (1) and kaempferol 7-O-⁻glucose (2) have been isolated from the leaves of Macaranga hispida (Blume), Mull.Arg. Isolation and purification were conducted by chromatography methods and chemical structure characterization was carried out by spectroscopic methods. The 5,7,3',4'-tetrahydrxy-6-geranyl flavonol (1) and kaempferol 7-O-glucose (2) had moderate cytotoxic activity against murine leukemia P-388 cell lines with IC₅₀ value of 0.22 and 101.5 μ g/mL, respectively. The IC₅₀ for antioxidant activities of (1) and (2) were 2.83 and 13.95 μ g/mL, respectively. The LC₅₀ of (1) and (2) from BSLT were 350 and $>1000 \mu$ g/mL, respectively.

Identifikasi dan Studi Bioaktifitas Senyawa Flavonoid dari Macaranga hispida (Blume) Mull.Arg. Dua senyawa flavonoid, 5,7,3',4'-tetrahidroksi-6-geranilflavonol (1) dan kaemferol 7-O-⁻glukosa (2) telah diisolasi dari daun Macaranga hispida (Blume) Mull. Arg. Isolasi dan pemurnian dilakukan dengan metode kromatografi dan karakterisasi struktur kimia dilakukan dengan metode spektroskopi. 5,7,3', 4'-tetrahidroksi-6-geranil flavonol (1) kaemferol 7-Oglukosa (2) memiliki aktivitas sitotoksik sel murine leukemia P-388 dengan nilai IC₅₀ masing-masing 0,22 dan 101,5 μ g/mL. Aktivitas antioksidan (1) dan (2) dinyatakan dengan nilai IC₅₀ masing-masing sebesar 2,83 dan 13,95 μ g/mL. Nilai LC₅₀ dengan uji BSLT (1) dan (2) masing-masing 350 dan $>1000 \mu$ g/mL.
