

Annual review of network management and security

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20448095&lokasi=lokal>

Abstrak

Contents :

- Contents by Author
- Network Management
- QoS Management in Multiservice Packet Networks
- End-to-End Service Monitoring through Active Call Testing
- The Role of BPO in the MVNO Marketplace
- Recognizing User Perception in the Design of Telecommunications Networks
- Learning to Be Lean
- Network Technologies and Applications
- Billing: Beyond Feeds and Speeds
- Management in the Technical Environment
- The ACCESS Precept: Road Map to Outsourcing Success
- Advances in Network Emulation
- Building Trust in Unpredictable Systems: The Case for Resilience
- An Introduction to UMTS and the Implications on OSS
- Internet Tomography in 4G System Architecture
- Strategic Management in the Telecommunications Industry
- Handoff Management in Wireless Data Networks Using Topography-Aware Mobility Prediction
- The Design of a Dynamic Emergency Response Management Information System (DERMIS)*
- Information Management: The Key to Compliance
- A Comprehensive Study of Price and Performance of Video over Next-Generation Optical Access Networks
- Network Inventory Redefined
- Predicting Internet End-to-End Delay: A Statistical Study
- Security
- Toward End-to-End Security
- Security Policy Compliance Management
- Security Equals Quality: The Future of Software
- Maintaining Normal Communication Operations by Reducing Denial of Service Effects by Worms and Viruses: A Case Study
- A Real-Time Intrusion-Prevention System for Commercial Enterprise Databases and File Systems
- The Elements of Effective Internal Network Security

- Mobile Ad Hoc Networks Security
- Security Challenges for CALEA in Voice over Packet Networks
- Dynamic Steganography Provides Additional Data Security for Network-Based Transactions
- Acronym Guide
