

The broadband millennium: communication technologies and markets

Flournoy, Don M., author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20448180&lokasi=lokal>

Abstrak

This book focuses on future markets for broadband products and services, as well as the infrastructure under development that is intended to make those markets more readily attainable and manageable. But it also takes on a more ambitious agenda. Its analysis shows how advanced technologies are facilitating the transition to a new world information and economic order in which much larger percentages of end users have a greater chance of getting what they want.

Contents :

- Preface
- Chapter 1 Broadband Agenda
- Chapter 2 Broadband Telephony
- Chapter 3 Broadband Cable
- Chapter 4 Broadband Wireless
- Chapter 5 Broadband Satellite
- Chapter 6 Broadband Broadcasting
- Chapter 7 Broadband Internet
- Chapter 8 Broadband Home/Office
- Perspectives on the Future
- Glossary
- URLS
- Index
