

Cellulose fibers : bio- and nano-polymer composites : green chemistry and technology

Kalia, Seseel, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20448406&lokasi=lokal>

Abstrak

Summary:

The current era of green science and technology has made the field of bio- and nano-polymer composite materials for advanced structural and medical applications a rapidly emerging area of research. This volume covers all the essential issues and topics
