ABSTRACT

The purpose of this study to determine the extent to which the training organization produces: definition and how to organize and clear knowledge for the management cadre that can be done easily and simply. The research was done to increase the number of cadres and the number of groups the organization in order to reduce child malnutrition as children with underweight. The experiment was conducted by using Action Research to see the results of the transformation in practical conditions using only post-test evaluation without control, with three stages of training, namely: preparation, execution and evaluation. Has achieved an increase in the number of cadres and organizations, as well as the achievement of targets for the implementation of training and training satisfaction, established an organizational structure with its work and the work plan for 2016 and 2017. The training has shown better results before than after and need further development.
