

Integer programming facets, subadditivity, and duality for group and semi-group problems

Johnson, Ellis L., author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20450562&lokasi=lokal>

Abstrak

This monograph considers pure integer programming problems which concern packing, partitioning or covering. For this class of problems, an algorithmic framework using a duality approach is offered.

Furthermore, the author proposes for the first time a general framework for both packing and covering problems characterizing the convex whole of integer solutions.
