Semantic web for the working ontologist: effective modeling in RDFS and OWL

Allemang, Dean, author

Deskripsi Lengkap: https://lib.ui.ac.id/detail?id=20450568&lokasi=lokal

----

Abstrak

"Semantic Web models and technologies provide information in machine-readable languages that enable computers to access the Web more intelligently and perform tasks automatically without the direction of users. These technologies are relatively recent and advancing rapidly, creating a set of unique challenges for those developing applications. Semantic Web for the Working Ontologist is the essential, comprehensive resource on semantic modeling, for practitioners in health care, artificial intelligence, finance, engineering, military intelligence, enterprise architecture, and more. Focused on developing useful and reusable models, this market-leading book explains how to build semantic content (ontologies) and how to build applications that access that content"--Provided by publisher.
