

Local energy: distributed generation of heat and power

Wood, Janet, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20451585&lokasi=lokal>

Abstrak

In future the UK's energy supplies, for both heat and power, will come from much more diverse sources. In many cases this will mean local energy projects serving a local community or even a single house. What technologies are available? Where and at what scale can they be used? How can they work effectively with our existing energy networks? This book explores these power and heat sources, explains the characteristics of each and examines how they can be used.
