Abstrak

ABSTRAK

Penelitian ini adalah penelitian retrospektif yang bertujuan untuk melihat perbedaan orientasi seksual dan indeks homofobia pada alumni sekolah berasrama khusus laki-laki dan alumni siswa sekolah reguler. Orientasi seksual diukur dengan Sell Assessment of Sexual Orientation yang diadaptasi dari Sell 1996, dan indeks homofobia diukur dengan Index of Homophobia Index of Attitude toward Homosexuals yang diadaptasi dari Hudson dan Ricketts 1990. Partisipan penelitian ini adalah 86 orang mahasiswa laki-laki alumni pesantren dan alumni sekolah Islam non-pesantren, berada pada usia dewasa awal 19-25 tahun. Hasil penelitian menunjukkan adanya perbedaan yang signifikan.

ABSTRAK

This retrospective research conducted to see the difference between sexual orientation and homophobia index in Indonesian Islamic boarding school alumni and regular school alumni. Sexual orientation was measured by Sell Assessment of Sexual Orientation adapted from Sell 1996, and homophobia index was measured by Index of Homophobia Index of Attitudes toward Homophobia adapted from Hudson and Ricketts 1990. Research participants are 86 male college students who are in early adulthood age group 19-25 years old. They are alumni of Indonesian Islamic boarding school and regular school. The result shows that there are significant difference.
