ABSTRACT

This study examines the influence of stocks price, volatility return, trading volume, trading frequency, market capitalization, and dummy LQ 45 to bid ask spreads. This study uses 126 of firm stocks as samples which are list in Indonesia Stock Exchange in 2015. I find in this study are stocks prices and trading volume have negative impact on bid ask spreads, volatility return and market capitalization have positive impact on bid ask spreads, however trading frequency as an additional variable that I add and dummy LQ 45 have no influence on bid ask spreads.
