Abstrak

Kesehatan merupakan hak asasi manusian dan salah satu unsur kesejahteraan yang harus diwujudkan sesuai cita-cita bangsa Indonesia. Upaya peningkatan kesehatan sangat penting bagi pembentukan sumber daya manusia Indonesia, ketahanan dan daya saing bangsa serta pembangunan nasional. Salah satu upaya yang dilakukan yaitu pekerjaan kefarmasian yang dilakukan oleh apoteker. Pekerjaan kefarmasian dapat dilakukan di Apotek. Apotek merupakan sarana Apoteker untuk melakukan praktik kefarmasian. Oleh karena itu, Kegiatan Praktek Kerja Profesi di Apotek membuat mahasiswa mengetahui serta mendalami tugas dan peran Apoteker di Apotek. Kegiatan yang dilakukan selama Praktek Kerja Profesi yaitu pengelolaan sediaan farmasi meliputi pengadaan, penerimaan, penyimpanan, pengndalian serta pelayanan farmasi klinik meliputi compounding, dispensing, pengkajian resep, pelayanan informasi obat serta swamedikasi. Tugas khusus di Apotek yaitu pengkajian resep penyakit hiperlipidemia yang bertujuan untuk mengetahui kerasionalan obat yang diterima pasien dan melihat drug related problem yang mungkin terjadi.

.....

Health is a human right and one of the elements of welfare that must be realized according to the ideals of the Indonesian nation. Efforts to improve health are very important for the establishment of Indonesia's human resources, national resilience and competitiveness and national development. One of the efforts undertaken is pharmaceutical work done by pharmacists. Pharmaceutical work can be done at the Pharmacy. Pharmacies are the means of Pharmacists to perform pharmaceutical practices. Therefore, Profession Practice Activity at Pharmacy makes students know and deepen the task and role of Pharmacist in Pharmacy. Activities undertaken during the Professional Practice of the management of pharmaceutical preparations include procurement, acceptance, storage, control and clinical pharmacy services including compounding, dispensing, prescription review, drug information service and swamedikasi. A special task at the pharmacy is prescribing hyperlipidemia prescriptions aimed at knowing the rationale of the drug received by the patient and looking at possible drug related problems.
