ABSTRAK

Nama : Astrid Permatasari Isnan
Program Studi : Farmasi
Judul : Praktek Kerja Profesi di Direktorat Jenderal Kefarmasian dan Alat Kesehatan Periode Mei Tahun 2017

Health is a healthy state that enables everyone to live productively socially and economically and is therefore a human right and one of the elements of well being that must be actualized. Drugs are component that cannot be replaced in actualizing public health. However, besides drugs, one of efforts in actualizing public health is the use of medical devices and household health supplies. Due to the widespread use of medical devices and household health supplies in the community, a regulation is needed to protect the public from medical devices and household health supplies that do not meet the quality requirements. The formulation of regulation related to medical devices and household health supplies is done by Direktorat Jenderal Kefarmasian dan Alat Kesehatan. Direktorat Jenderal Kefarmasian dan Alat Kesehatan has role in organizing the formulation and implementation of policies in the field of pharmaceutical and medical devices in accordance with legislation. In order to prepare pharmacists that understand the responsibilities of pharmacists in the field of medical devices and household health supplies, it is necessary to have a professional work practice at the Directorate General of Pharmacy and Health Devices on May 22, 2017. Through PKPA of the Government, it is hoped that candidates for pharmacists can have vision, knowledge, skills, and practical experience to carry out pharmacy in the Government.
