### Abstrak

Praktek kerja profesi Apoteker di PT. Dexa Medica Palembang bertujuan untuk Memahami peranan, tugas dan tanggungjawab apoteker serta penerapan Cara Pembuatan Obat yang Baik CPOB di Industri Farmasi. Selain itu, praktek kerja profesi apoteker bertujuan untuk memperoleh wawasan, pengetahuan, keterampilan dan pengalaman praktis untuk melakukan pekerjaan kefarmasian serta memiliki gambaran nyata tentang permasalahan pekerjaan kefarmasian di industri farmasi. Praktek Kerja profesi apoteker dilaksanakan di departemen Quality Assurance dibagian validasi pembersihan. Kegiatan yang dilakukan di PT Dexa Medica Palembang adalah induksi dan touring ke departemen-departemen yang ada di PT Dexa Medica Palembang. Selain itu, mahasiswa diberi pengetahuan tentang peran kerja setiap departemen di Industri Farmasi. Tugas khusus yang dilakukan selama PKPA ialah membuat laporan penentuan permitted daily exposure PDE Repaglinide menggunakan Health-Based Data sebagai Acceptance Limit dalam Validasi Pembersihan. Tugas khusus ini memiliki tujuan yaitu dapat memahami konsep pendekatan baru dalam menentukan keberterimaan menggunakan PDE, menentukan nilai PDE dari zat aktif obat di PT. Dexa Medica Palembang, dan membandingkan nilai kriteria keberterimaan antara metode standar 10 ppm dengan pendekatan PDE.

.....

Pharmacist Profession Internship at PT. Dexa Medica Palembang aims to Understand the role, duties and responsibilities of pharmacists as well as the application of Good Manufacturing Practice CPOB in the Pharmaceutical Industry. In addition, the professional practice of pharmacists aims to gain insight, knowledge, skills and practical experience to undertake pharmaceutical work and to have a clear picture of the pharmaceutical work in industry. The Pharmacist profession 39 s job practice is carried out in the Quality Assurance department under the cleaning validation section. Activities undertaken at PT Dexa Medica Palembang is induction and touring to the departement existing in PT Dexa Medica Palembang. In addition, students are given knowledge about the work role of each department in Pharmaceutical Industry. A special task undertaken during PKPA is to prepare a report on the determination of permitted daily exposure PDE of Repaglinide using Health Based Data as Acceptance Limit in Cleaning Validation. This specific task has goal of being able to understand concept of a new approach in determining acceptability using PDE, determining the value of PDE from drug active substances in PT. Dexa Medica Palembang, and compare the acceptance criteria score between the standard 10 ppm method and the PDE approach.
