ABSTRAK

Perubahan fisiologis merupakan hal yang terjadi pada lansia, perubahan meliputi perubahan sistem integumen. Tujuan dari karya ilmiah ini adalah menganalisis hasil praktik klinik Keperawatan Kesehatan Masyarakat Perkotaan klien dengan kerusakan integritas kulit. Praktik klinik dilakukan selama tujuh minggu di Sasana Tresna Werdha (STW) Budi Mulia 1 Ciracas. Hasil pemeriksaan fisik yang didapatkan adalah pada klien terdapat eksem, gatal-gatal (pruritus), dan kulit kering (xerosis). Klien juga mengalami penurunan kognitif. Intervensi keperawatan yang dilakukan adalah perawatan kulit dengan emollient. Intervensi dilakukan selama enam minggu, dengan total intervensi adalah 30 kali pertemuan dan teknik yang digunakan adalah dengan mengolesi vaseline di kulit sambil dilakukan massage. Hasil setelah diberikan intervensi adalah peningkatan elastisitas, hidrasi, tekstur, integritas kulit, kondisi lesi kulit, dan kemerahan dari gangguan sedang menjadi gangguan ringan. Perawat dapat melakukan pemberian perawatan kulit pada lansia sebagai upaya meningkatkan kualitas integritas kulit sehingga kualitas dan kesejahteraan lansia meningkat.
