ABSTRACT

This study was conducted for the purpose to obtain valuable information on how far health center had done its role on improving children nutritional status.

This study did not attempt to evaluate health program implemented by health center, but only differentiated the two extremes of health center performance (low and high performance) and their contribution to improving children nutritional status.

This research report has been presented in three parts. Part 1. Introduction consisted of background of the study, problem statement and rationale of the study, literature review, causal model, hypotheses, objectives of the study, variables and indicators. Part 2. Manuscript for publication was presented according to Food and Nutrition Bulletin's format, there were abstract, introduction, subjects and methods, results, discussion, conclusion, references, and appendices. Part 3. Appendices consisted of questionnaires, methodology, ethical consideration, operational definition, detailed results, recommendations, instruction for the contributors of Food and Nutrition Bulletin, references and curriculum vitae.
