

Recognizing and correcting developing malocclusions : a problem-oriented approach to orthodontics

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20464415&lokasi=lokal>

Abstrak

Recognizing and Correcting Developing Malocclusions: A Problem-oriented Approach to Orthodontics provides an evidence-based approach to early treatment, an often-controversial topic. Based on decades of experience in clinical practice and education, Drs. Ara·jo and Buschang clearly present treatment protocols for mixed-dentition patients with various malocclusions and other orthodontic problems. Class I, Class II, and Class III malocclusions are covered extensively, along with eruptive deviations and open-bite malocclusions. The literature is comprehensively reviewed to ensure that the reader thoroughly understands the development, phenotypic characteristics, and etiology of each type of malocclusion. Taking a problem-oriented approach, the editors provide detailed information for each case, develop comprehensive problem lists, and then provide evidence-based treatment solutions. The clinical focus of the text is ideally suited for the private-practice clinician, with numerous -- references and academic underpinnings to ensure its suitability for orthodontic and pediatric dentistry residents.
