

The human species : an introduction to biological anthropology

Relethford, John., author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20464996&lokasi=lokal>

Abstrak

"This text is an introduction to the field of biological anthropology (also known as physical anthropology), the science concerned with human biological evolution and variation. The text addresses the major questions that concern biological anthropologists: What are humans? How are we similar to and different from other animals? Where are our origins? How did we evolve? Are we still evolving? How are we different from one another? What does the future hold for the human species?"--
