Abstrak

Di era JKN ini, rumah sakit dituntut harus efisien dalam mengendalikan biayalayanan agar tidak melebihi tarif INA CBGs dengan catatan mutu layanan harustetap terjaga dengan baik. Penelitian deskriptif kuantitatif ini bertujuanmenganalisis biaya berdasarkan tarif rumah sakit dan klaim INA CBGs padapasien peserta BPJS kasus sectio caesarea di RSUD dr. Doris Sylvanus padaJanuari sampai Agustus Tahun 2016. Berdasarkan hasil penelitian diketahui biaya yang tidak dibayar sesuai tarifrumah sakit sebesar Rp 1.708.663.354 42 . Biaya pelayanan persalinan sesarringan sesuai tarif rumah sakit pada kelas 1 sebesar Rp 10.267.710,-, kelas 2sebesar Rp 9.441.399,- dan kelas 3 sebesar Rp 8.591.730,-. Komponen biyatertinggi adalah biaya tindakan operasi. Sehingga perlu dilakukan kajian ulangtarif pelayanan Sectio caesarea.

<hr><i>In this National Health Insurance period, hospital ospitals are required to be efficient in controlling the cost of services so as not to exceed the tariff of INACBGs with the quality record of the service must be maintained properly. This quantitative descriptive study aims to analyze the cost of Sectio caesarea of BPJS participants based on hospital rates and INA CBGs rates in dr. Doris Sylvanus regional public hospital on January until August 2016.

The result revealed that the unpaid cost according to hospital rates is Rp1.708.663.354 42 . The cost of light cesarean delivery service according to hospital rates in grade 1 is Rp 10,267,710, , 2nd grade is Rp 9,441,399, and grade3rd is Rp 8,591,730, . The highest cost component is the cost of surgery. So it is necessary to review the hospital rates of cesarean delivery service.</i>
