Abstrak

Penelitian ini bertujuan untuk mengoptimalkan proses penatausahaan dan pengendalian persediaan logistik bencana alam pada Direktorat Perlindungan Sosial Korban Bencana Alam PSKBA dengan pendekatan Soft Systems Methodology SSM . Penelitian mengidentifikasi beberapa permasalahan pada beberapa area seperti permasalahan dalam kegiatan penatausahaan, penyaluran, pelaporan, pengawasan dan evaluasi, serta permasalahan umum lainnya.

Permasalahan-permasalahan tersebut berusaha dipecahkan oleh penelitian ini bersama para pihak terkait pada Direktorat Perlindungan Sosial Korban Bencana Alam PSKBA dengan menghasilkan beberapa kesepakatan dalam rangka optimalisasi proses penatausahaan dan pengendalian persediaan logistik bencana seperti: pembangunan kesepahaman persepsi mengenai pengelolaan logistik dengan daerah melalui nota kesepahaman; pelaksanaan peningkatan kompetensi pengelola logistik bencana dan efektivitas monev melalui pelatihan yang terstandarisasi dan pembentukan Tim Pembina pengelolaan logistik bencana; serta peningkatan prosedur dalam kegiatan kompilasi laporan logistik.

<hr><i>This study aims to optimize the natural disaster logistic inventory administration and control in Directorate of Social Protection for Natural Disaster Victims PSKBA with Soft System Methodology SSM approach. This study identifies several issues concerning the administration and control of disaster logistics inventory in several area such as administration, distribution, reporting, monitoring evaluation, and other critical activities.

These problems are solved by this study with the related parties at the Directorate of Social Protection of Natural Disaster Victims PSKBA by producing several agreements in order to optimize the process of administration and control of disaster logistic inventory through the development of perceptions of understanding the disaster logistic management with the local authority through memorandum of understanding implementation of the increased competence of disaster officers and monitoring and evaluation effectiveness through standardized training and formation of disaster management logistics management teams and improvement of procedures in compilation of logistik reports.</i>
